BUSINESS-RISK CONSULTING **-Defensive Road Safety Driver Training- Armored / Light Vehicles**

The Facts :

The World Health Organization reports that "93% of the world's road fatalities occur in low- and middle-income countries", even though these countries have approximately 60% of the world's vehicles.

This is a major concern for road users, transport authorities, and drivers, who face this issue daily. Injuries caused by road traffic incidents are the top cause of preventable death among young people, and a significant problem in many places.

There is a pressing need for a long-term and specific approach to road safety that goes beyond infrastructure improvements. This approach focuses on enhancing awareness, relearning the basics, and improving drivers' behavior and alertness to danger.

Our solution:

We specialize in providing driving training for road safety, with a focus on either civilian armored vehicles or light vehicles, particularly in challenging and hostile environments. Our specific driver training and road safety programs are designed for aid and development organizations, humanitarian agencies, and security professionals who operate in environments with high road risks and in hostile settings.

QUALITY ASSURANCE AWARDED :

Our Defensive Road Safety Armored Vehicle Driver Training is Quality Assured :

The training courses, materials, and content used in our training delivery have been externally assured by the Royal Society for the Prevention of Accidents (RoSPA).

This means that our methods, content, and course delivery have undergone an independent and external review by RoSPA's training delivery specialists. These specialists have a background in advanced behavioral driver training and have ensured that the courses are relevant, have in-depth knowledge with specific content added, and meet international standards for our trainers' competencies and course delivery quality.

The course assurance badge is crucial because it confirms that our specific armored vehicles course and content meet international standards and provide our students with high-quality methods to achieve those standards.

Benefits :

**We enhance your skills
to help you embrace
your challenges**

Do you want to improve your drivers' skills and awareness, reduce their exposure to road risks, and change their road safety behavior to cut your fleet management costs? Our training can help your drivers be more efficient and adopt a safer, more respectful approach while on the road.

We are fully operational to conduct Defensive Road Safety driving course with contextualised approach and syllabus.

Our training is designed to fulfill the needs and enhance the skills of every driver or transport staff using either an Armored or Light vehicle within their specific context of operation.

This bespoke Road Safety program is delivered through theoretical lessons and on-road coaching sessions aimed at all drivers by improving and training them to be confident, respectful and safer drivers on the road

We motivate drivers to be proactive and develop a safety and security awareness attitude on the road to reduce the likelihood of road traffic accidents and unprofessional behavior.

Our Defensive Road Safety Driver Training is designed to avoid and reduce road traffic accidents, instill professional attitudes and habits, and provide a road safety awareness management policy that enables our participants to be more efficient and safer on the road and beyond while also reducing fleet management costs.
